BOOSTING YOUR CLEANING PROGRAM WITH DOBER

REPEATABLE CLEANING PROCESS

Can you be sure your current cleaning process works every time, even when changing operators? Dober provides robust cleaning recommendations with detergents targeted to your particular needs and capabilities. Our cleaning agents take on the brunt of the work through correct chemistry, leaving little room for deviation.

QUALITY CLEANING AGENT

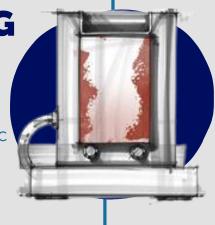

Is your detergent manufactured under cGMP practices? Is there lot traceability?

- Dober can provide complete lot traceability for all Chematic detergents and their raw materials.
- Our quality program includes a full change control policy.

- Dober works with strategic partners in regulated industries to develop cleaning agents specifically formulated to handle their challenging residues.
- Using a detergent that is targeted for your specific residue allows for more efficient cleaning, improved scheduling and increased production capacity.

SAFETY

Is your detergent safe for operator handling? Compatible with your equipment MOC? Can it be safely disposed of?

- At usage concentrations, many Chematic detergents are not corrosive, and are safe for operator handling and manual cleaning.
- Dober provides data on the compatibility of the Chematic detergents with common materials of construction.
- Chematic detergents can be disposed of according to local municipality regulations and typically do not need to be captured.

SAVE TIME, ENERGY & MONEY

Are you cleaning as efficiently as possible? Ineffective cleaning or needing to reclean increases labor and can be costly. Dober's Chematic solutions can help streamline and improve your cleaning process.

- Water and energy consumption: Attention to the aforementioned categories leads to an effective cleaning process and can help save on water and energy usage.
- Time and money management: Effective cleaning agents eliminate the need for recleaning, reducing total detergent usage and cleaning time.
