## Eliminate Liquid Chemistry. GO SOLID

## Lower Weight & Volume

10 Gallons of Liquid Chemical

## SMALLER FOOTPRINT

Eliminate handling chemicals drums and pails ranging from 5 to 55 gallons with the use of Smart Release Technology. Our ergonomically friendly packaging is ideal for those difficult-to-reach locations in mechanical rooms.

Enjoy Smart Release Technology's smaller chemical footprint versus a liquid program and less stringent storage requirements. Best of all, a Smart Release Technology program requires no containment.

One box of Dober's Smart Release Technology chemistry is equivalent to two 5-gallon pails of liquid chemical. With the ergonomically friendly 25-pound packaging in sustainable and recyclable cardboard boxes, moving and storing your inventory onsite has never been easier.

With a Smart Release Technology program, you'll have reduced carbon emissions, quicker delivery times, reduced greenhouse gas emissions and, most of all, decreased chemical exposure for <u>you and your customers</u>. On top of all that, water savings can be recognized from no longer needing to triple rinse used pails and/or drums of liquid chemicals.
